

Industry House Waste

*The term 'sustainability' means different things depending on who you ask.
In the spirit of self-determination, Black Sustainability categorizes eleven (11) interdisciplinary focus areas as Industry Houses that work together cooperatively. Industry House members host regular House Meetings where issues, opportunities and desired collective outcomes are discussed.
Each meeting crowdsources regional challenges and has an open floor where participants work on & exchange solutions.*

Join This House

To decrease consumption of natural resources, promote multiple reuse of materials taken from nature & minimize creation of waste.

Promotion of a salvage economy & best waste management practices for the restoration of earth and our communities
